lamp shades: KA-KY-20/30 (K2)

STARLIGHT lamps do possess a lot of qualities which make them highly recommended for lighting of most interiors.

All lamps are designed to complement the modern aesthetic look and are based upon an easily understood assembling system.

Made of antistatic, colour-fast and non inflammable material, STARLIGHT lamps do not attract dust, do not break or fade and are completely washable.

Their light is a soft and diffused one which creates a pleasant atmosphere.

Every detail of each STARLIGHT lamp has been studied so as to make hanging and unhooking of the lamp as simple as possible.
